

MultiBag-Pro

Disc filter bags for White and Green Liquor filtration rest upon filter disc segments normally made from perforated steel sheet. The MultiBag-Pro has a built in support fabric with a 3 dimensional structure allowing a better flow under the filtration fabric into the disc filter sector. Combined with the modern up to date shrinkable multifilament filter fabric makes the very best filter media for this application. Pushing both capacity and lifetime.

The MultiBag-Pro design includes also a built in self sealing bottom gasket, a super strong zipper and a double top end gasket. Ensuring a super simple and leakage safe installation.

The MultiBag-Pro is a 100% Polypropylene product withstanding the aggressive application as well as cleaning agents. One of our Gleen-Line products with the very best environmental properties.
