

## A corrugated disc filter bag concept from Estonia!

**SuperBag** has been developed to perfection during many years including yarn manufacturing development, weaving technology inventions and bagmaking knowhow stretched to full extent!

No efforts has been spared to make the **SuperBag** concept fully variable to be adopted for any need in disc filter applications. Also the **SuperBag** has been designed for safe and easy disposal to care about our common environment!

**SuperBags** are tailored to fit any machine and sector type and incorporates a patented *unique and fully variable corrugation geometry design* to meet any specific application need or customer request!

We are happy to offer our help to either fill your need of spare filterbags, to simplify the bag installation, *improve the filter capacity and function* or any other need there might be!
