

The best thing since reinforced heels on nylon stockings

To filter raw water we have also, alongside our standard products, developed a complete filter product. It is supplied with wear protection already firmly sewn on.

Because of these reinforcements, placed where the filter cloth touches and rubs against the frame, the actual cloth is subjected to less wear. This is conducive to the long-term effectiveness of the cloth. The fluffy needle-felt strip along every exposed edge has a self-sealing action and further ensures reliability.
